PROJECTS

JobZeal - Job Portal Application | *MongoDB, Express, React, Node.js*   **Github**

- Implemented role-based access control, allowing job seekers to apply for jobs and employers to post and manage job listings dynamically.
- Established secure user authentication and authorization with *JWT* and implemented cookie parsing for handling cookies in user sessions.
- Integrated email notification functionality using *Nodemailer* to notify users about application status updates.
- Implemented secure resume storage with *Cloudinary* for safe and authorized access.

MediLink - Doctor Appointment Platform | *MongoDB, Express, React, Node.js, Redux Toolkit, Bootstrap*   **Github**

- Implemented role-based access control with three roles: admin, doctor, and user.
- Established secure authentication using *JWT* tokens for all roles, and utilized *Redux Toolkit* for state management.
- Admins can seamlessly approve doctors and manage user lists, doctors can effortlessly approve appointments, and users can conveniently book appointments with doctors, all with the sleek component styling of *antd*.
- Integrated a notification feature to keep users informed about appointment status and other updates.

CodeCast - Code Collaboration Platform | *React, Express, Node.js, Socket.IO*   **Live Link**   **Github**

- Enabled real-time code collaboration for simultaneous editing and updates across multiple users on the platform.
- Implemented room creation/joining via unique IDs, real-time updates, and a responsive UI.
- Integrated *Ace Editor* for syntax highlighting and editor customization.
